

This system is conveniently installed under your sink with your choice of standard filter faucet, included at no extra cost

# UltraCeram® Stainless Steel Triple Undersink Premium Drinking Water System

## Standard Filter Faucets featuring a bright chrome finish.

The following faucets are available as an upgrade to your system:

## Stainless Steel Faucets and Mixers featuring a brushed chrome finish.

## Mixers

Please refer to our **Faucets Brochure** to view our complete faucet range.

**ULTRACERAM - 0.5 MICRON ABSOLUTE**  
Complete Micro-Biological Protection

**CARBON BLOCK - 1 MICRON**  
Superior Chlorine & Heavy Metal Removal

**5 YEAR WARRANTY\***  
Hand Built in Australia

### The UltraCeram® Stainless Steel Triple Undersink System

- ✓ **Exceptional Cost-To-Performance Value**
- ✓ **The Australian WaterMark Standard Approval of this system is your *guarantee* of quality.**

Specifications	
Filter Output	5,000 litres
Max Flow Rate	3 litres p/min
Dimensions (cm)	32(W) x 33H) x 12.5(D)
Micron Rating	0.2 Micron nominal
Warranty	5 years*

\*Warranty Terms & Conditions apply.

### Filtration Test Results

IMPURITIES	REDUCTION %	
e-Coli	99.99	
Residual Chlorine Content	99.0	
FLUORIDE	97.6 - 99.0	
<b>THM</b>	Bromodichloromethane	99.3
	Bromoform	99.3
	Chloroform	99.5
	Dibromochloromethane	99.3
<b>METALS</b>	Zinc	99.7
	Iron, Lead, Manganese, Cadium	99.9
	Copper, Mercury	99.9
	Aluminium	98.7

### Stage 1 - UltraCeram® Stera 0.5 Micron Absolute Pre-Filter

**Diagram 2 - The UltraCeram® Stera Filter Cartridge**  
Made in UK

1 Manufactured with UltraCeram® Stera Ceramic which provides genuine sub-micron filtration. This stage reduces fine particulate matter, bacteria, cysts and turbidity. Silver, incorporated within this ceramic structure provides enhanced bacteriostatic and self sterilizing properties.

✓ Mechanically filters out harmful bacteria and parasites.

Removes	
Parasites/Cysts	Salmonella
Cryptosporidium	Cholera
Giardia	Sediment
Bacteria	Dirt
e-Coli Bacteria	Rust

✓ Removing the above contaminants protects the Carbon Block Post Filter cartridge, allowing it to function more effectively and last longer.

**Diagram 3 - The UltraCeram® Fluoride Filter Cartridge**  
Made in USA

✓ EPA Listed Media

### Stage 2 - UltraCeram® Fluoride Filter

2 The fluoride removal media is made from the same mineral that rubies and sapphires (corundum) are made from, in crystalline form. The process 'selective adsorption' is a physical/chemical reaction whereby the fluoride ions are removed by binding to the media's oxidised surface. This highly porous material has a large surface area of 200meter<sup>2</sup> per gram for optimal filtration.

Removes
<b>97.6% - 99.0% Fluoride</b>

\*We recommend replacing your UltraCeram Stera cartridge every 2-3 years and the Carbon Block cartridge yearly dependent on water quality and usage.

### Stage 3 - Carbon Block 1 Micron Post-Filter

**Diagram 4 - Carbon Block Post Filter Cartridge**  
Made in USA

3 The 1 micron Carbon Block filter effectively removes chlorine, heavy metals and the unpleasant tastes and odour associated with these contaminants.

Made from premium coconut-shell carbon, fresher, sweeter tasting water is ensured.

Removes	
Chlorine	Lead
Aluminium	Mercury
Cadmium	Zinc
Copper	Odour
Iron	Taste

✓ This combination of ultra-fine Ceramic and quality Carbon Block will provide you and your family with superior quality filtration and much improved taste compared to other standard twin filter systems.

#### Available plumbing options

We stock a large range of brass plumbing parts and John Guest Speedfit® fittings for your plumbing requirements. All fittings include a Pressure Limiting Valve.

#### Undersink Setup

- 1 Housing
- 2 Chrome Faucet
- 3 Stainless Steel Bracket
- 4 Pressure Limiting Valve
- 5 Tee Piece
- 6 Ministop Valve
- Red Clips
- A 1/4" blue tube connects the feed water valve to the pre-filter.
- B 1/4" blue tube connects the post filter to the chrome faucet.
