

# Fluoride Twin Countertop

featuring the Doulton Ultracarb®

**Fluoride Filtration**  
Filters up to 99.9% of fluoride

**Doulton Ultracarb®**  
Mechanically filters harmful bacteria

**5 Year Warranty\***  
Hand built & tested in Australia

Fitted with the Water Shop Fluoride and genuine Doulton Ultracarb® filter cartridges, this unique system stands conveniently on the countertop for easy 'self' installation to your existing faucet, using the special diverter valve provided.

- This system provides a quality, cost effective and portable method of water filtration, removing all contaminants of concern to the user including Fluoride.

The Australian WaterMark Standard Approval of this system is your guarantee of quality.

• Exceptional cost-to-performance value!

## Specifications

Item Code	IT003053
Filter Output	5,000 litres
Max Flow Rate	3 litres p/min
Dimensions (cm)	23(W) x 32(H) x 13(D)
Micron Rating	0.9 micron absolute
Warranty	5 years*

## Filtration Test Results

Impurities	% Reduction
Sediment/Dirt, Rust	>99.999
<b>Pathogenic Organisms:</b>	
e-Coli, Cholera, Shigella, Typhoid	>99.999
Cryptosporidium, Giardia	>99.999
<b>Trace Organics:</b>	
Volatile Organic Contaminants	>99.9
Pesticides & Herbicides	>99.9
Lead, Manganese, Cadmium	>99.9
Zinc	>99.7
<b>Inorganics:</b>	
Residual Chlorine Content	>99.0
Fluoride	>97.6 - 99.0

# Fluoride Twin Countertop

## STAGE 1 The Water Shop Fluoride Filter 1 micron **Made in USA**

The Water Shop Fluoride Cartridge contains fine-mesh Activated Alumina to effectively reduce fluoride in your water supply by up to 99.9%. By the process of selective adsorption, a physical/chemical reaction takes place whereby the fluoride ions are removed from the water supply by binding to the media's oxidised surface.

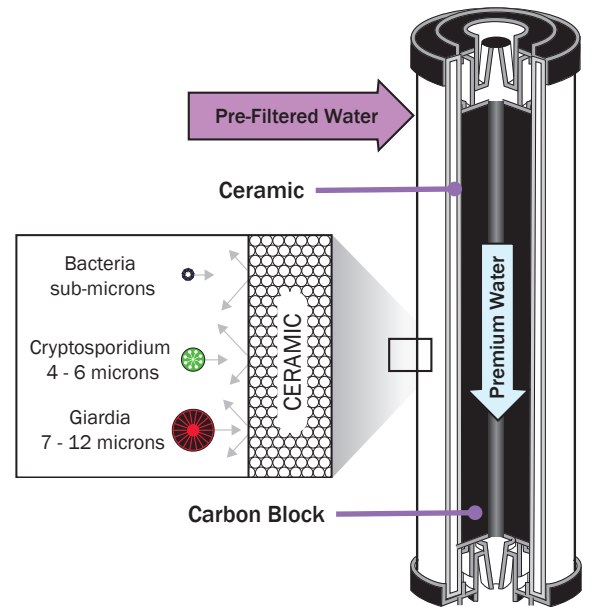

💧 Reduces fluoride in your water supply by up to 99.9%

## STAGE 2 The Doulton Ultracarb® Filter 0.9 micron absolute **Made in UK**

The outer shell - manufactured with Doulton Sterasyl® ceramic - mechanically filters out harmful bacteria and parasites to sub-micron filtration. This stage reduces fine particulate matter, bacteria, cysts and turbidity. Silver, incorporated within this ceramic structure provides enhanced bacteriostatic and self sterilising properties.

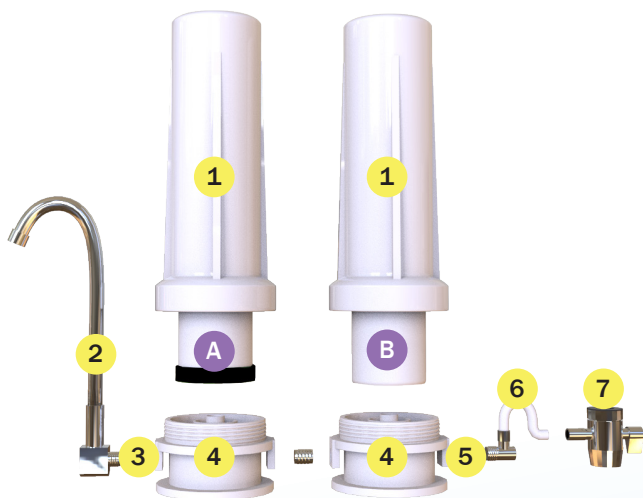

An inner core of quality NSF certified (ANSI 61) coconut shell based granular activated carbon removes chlorine and organic compounds. Ion exchange resin incorporated within the inner core effectively reduces lead, zinc and other heavy metals.

**The Doulton Ultracarb® filter cartridge can be washed and reused**

If the flow rate slows, simply scrub clean under cold, running water with a clean sponge or brush\*.
